

Storyboard

HOME PAGE:

The user sees a pokedex that is clickable.

Brings to the pokedex webpage.

POKEDEX PAGE:

Users see all pokemon specific to that region.

STARTERS PAGE:

As each region has different starters, this current region starters shows.

Clickable to show other evolutions.

LEGENDARY PAGE:

As each region has legendaries and mythicals per region,

Be able to see each mythical and legendary, their typing, and pictures.

More designed as they are more special.

ABOUT PAGE:

Talks about who I am.

What this project is.

How to contact me.

And major links that helped(citations).

WIREFRAME

Home Page Layout:

Header with title and navigation bar. The Centered Pokédex image acts as the main call-to-action. Below it is a clickable button leading to the Pokédex page. Footer contains credits.

Pokédex Page Layout:

Header and navigation at top. The main content area displays Pokémon cards in a grid layout. Each card contains images and basic Pokémon information. Hover effects enhance interactivity.

Starters Page Layout:

Starter selection displayed as a briefcase-style interactive box. Users click a starter to reveal its full evolution line below. Layout mimics Professor Rowan selection screen.

Legendary Page Layout:

The Toggle system allows switching between Legendary and Mythical Pokémon. Pokémon displayed in styled cards with themed colors and hover glow effects.

About Page Layout:

Contains project explanation, purpose, and references. Reference section includes clickable image-based links to external Pokémon databases and sources
